

# Nursing Support Services & Diabetic Care in Schools

## Diabetes Support Plans

### Nursing Support Services Plans

**SOME students will have this plan, as determined by NSS.**

Nurse will bring the plan and train staff. Only delegated staff can provide support to the student under the plan.

The Nurse reserves the right to refuse delegation to individuals they feel will not safely or successfully implement the plan.

Mechanisms will need to be established to monitor the plan and communicate information to the EA. This typically goes through the Case Manager or Principal. EAs are not required to carry phones to allow the Nurses to interact directly with them at any time.

Record keeping happens on the plan, in the manner determined by the nurse. Original plan must stay in the binder. A letter confirming diagnosis can be placed in the designation file.

EA3s can be confirmed by having the nurse sign off on the Delegated nursing form.

### Diabetes Support Plan

**ALL students with diabetes will have this plan:**

- It's the only plan for students without NSS support
- It's the back-up plan for students with NSS – used when delegated staff or usual procedures (e.g., a field trip) are unavailable
- Link to the plan: [Diabetes Support Plan](#)

These plans must leave parents in the driver's seat – staff can facilitate checks and help record things, but **the parent must make all decisions about glucose administration/extra food etc.** Typically, the "bar" for calling for emergency services is a bit sooner – the parent must be aware it is being monitored by staff who have not been trained by NSS.

Record keeping happens on the regular district Medication Log. Copies of the plans may be placed in the student's designation file.

EA2s support, where needed.
